

GLITCH

MEDIA 2

SPRING 17

FRIDAY 1-6

» Everything on a computer is simply a collection of 1's and 0's in differently shaped and sized containers with different instructions for understanding the code inside.

» breaking technology
art is the re-ogies
about relation- - or
ships “texts” inate our daily
that - that lives.
we have
have come
with to
the dom-

Invented the back button:

“An iPhone is not technology, it’s packaging and conventions. [...] Your software choices are like any addiction or religion, they want your loyalty and they want your money and they want you to think like them. [...] it’s culture politics masquerading as technology.”

-Ted Nelson

» J. Hillis Miller wrote about the critical relationship to media that contemporary thinking is calling us to have:

“Deconstruction is not a dismantling of the structure of a text, but a demonstration that it has already dismantled itself. Its apparently solid ground is no rock, but thin air.”

“

>> a glitch

is this (unexpected) moment in a system that catches us off-guard && when it does that, it (more often than not) reveals aspects of that system which might otherwise go unnoticed (while the system attempts to remain “invisible”). b/c glitch art is fundamentally about using technology in ways they weren't intended, it's not uncommon for glitch artists to be met w/all kinds of obstacles (in the form of “error” messages or “updates” that render a glitchy-exploit obsolete) which, regardless of the artist's intention, forces them to either accept the tech's embedded ideology or actively rail against it.

“ -nickbriz

» **Things you need to do:**

» **Uncompressed or minimally compressed digital image files. [TIF, BMP, RAW, etc.]**

» **Save a copy of your minimally compressed digital image files.**

» **Get a copy of Audacity 2.1.5** » <https://sourceforge.net/projects/audacity/files/audacity/2.1.5/>

» **While you're installing software: install HomeBrew, ffmpeg, moshy, and aviglitch.**

»» **Open Terminal**

»» **Type:**

```
/usr/bin/ruby -e "$(curl -fsSL https://raw.githubusercontent.com/Homebrew/install/master/install)"  
brew install ffmpeg  
gem install moshy  
gem install aviglitch  
cd Desktop
```

» The course of industry as well as the politics of digital art are dependent on the agency that you, the artist are capable of expressing.

» Digital literacy is a prerequisite for agency in a networked culture.

» We [designers, artists] do ourselves a disservice when we think of everyday people as “consumers” - users are already doing what they want with it - think Charlie Chaplin/his cane [video]
